

*Markus Lehtikevari, Robin Åman and Yasser Adem Nur*

## Meet Yasser, Markus and Robin – three key team members

**Yasser Adem Nur** started at ABECE almost three years ago as a Junior Engineer in the automation team. He has been working next to our senior automation engineers and is now a fully qualified member of the automation team.

Our experienced team of installation engineers has been further strengthened by **Markus Lehtikevari**. His vast experience with many years of mechanical field work will truly be of great help at any mechanical installation or service work.

**Robin Åman** is a well-established electrical engineer that joined us this December. We are excited to have him in our team, making use of his experiences involving installation and programming with extremely high accuracy and system stability.

We are building the best ABECE team ever, securing the world class supply you expect from The Global Leader of Concrete Roof Tile Machinery.

We also wish you all a very happy and relaxing Summer!

Stay safe and keep in good health!
