

SUMMER HOLIDAY PERIOD APPROACHING

More important than ever to order spare parts in due time

We are approaching the summer holiday period in Europe and Sweden (mid-June until beginning of August). As you all know this always causes longer lead-times of spare parts from order to delivery.

Right now we are also in a situation where both the lead-times of many parts and the transportation times are longer than normal. This due to the global situation with the pandemic, raw material shortage, unbalanced container fleet, and reduced flight frequencies.

Altogether, this means that this year it is *more important than ever to order spare parts in due time*. Look over your needs and plan your maintenance and service even further ahead. We are always here to help and give advice, only an e-mail or a phone call away!
